- Useful links

What is Redmine

- ♦ Redmine is a flexible project management web application. Written using the Ruby on Rails framework, it is cross-platform and cross-database.
- ♦ Redmine is open source and released under the terms of the GNU General Public License v2 (GPL).

Features

Some of the main features of Redmine are:

- ♦ Multiple projects support
- ♦ Flexible role based access control
- ♦ Flexible issue tracking system
- ♦ Gantt chart and calendar
- ♦ News, documents & files management
- ♦ Feeds & email notifications
- ♦ Per project wiki
- ♦ Time tracking
- ♦ Custom fields for issues, time-entries, projects and users
- ♦ SCM integration (SVN, CVS, Git, Mercurial, Bazaar and Darcs)

Features (cont.)

- ♦ Issue creation via email
- ♦ Multiple LDAP authentication support
- ♦ User self-registration support
- ♦ Multilanguage support
- ♦ Multiple databases support
